

AUTOMATIC STONE LATHE

SNM-LTH

The technology

This automatic stone lathe is the most productive of its kind in the world and the only one that can turn a baluster in one path and without human intervention (all other lathes need two paths). This machine can be supplied with one turning head or two heads: one which is fully automatic for turning and the other which is for manual polishing. Therefore, with one worker, it can turn one baluster while polishing another simultaneously.

Technical data

	LTH-700x3000	LTH-500x3000
Diamond blade diameter	30cm / 35cm	30cm / 35cm
Number of heads	1 or 2	1 or 2
Baluster diameter	70cm	50cm
Baluster length	1m (turning and polishing) or 3m (turning only)	1m (turning and polishing) or 3m (turning only)
Main motor output	15 hp	15 hp
Total machine power	18 hp	20 hp
